

## Willamette Falls Paper Company is excited to bring new energy and innovation to papermaking in the Northwest.

As the only coated freesheet producer on the West Coast, we offer nimble, responsive manufacturing that delivers what our customers need—quality paper with fast, on-time delivery. In addition to our well-known legacy grades, the mill is a leader in the development and innovation of non-traditional fiber sources such as pulp from wheat straw.

### CAPISTRANO

Capistrano® is a #2 coated paper that delivers the strength and consistency required for today's high-speed presses. 92 Brightness, basis weight range from 60# text to 80# cover

### SONOMA

With a reputation as an industry workhorse, Sonoma® is a high-value, #3 coated freesheet paper that offers solid consistency, run after run. 86 – 88 Brightness, basis weight range from 45# text to 80# cover

### NATUREweb & NATUREplus

These 10% to 30% PCW grades have the same specifications and basis weights as our Sonoma and Capistrano brands—allowing you the option to choose a recycled paper without sacrificing quality.

### ENVELOPE

This White Wove & High Bulk Envelope features good opacity and brightness, available in 92 bright, blue-white shade. Basis weights include 20#, 24# and 28#.

### UNCOATED OFFSET

This superior uncoated offset smooth sheet is available in 50# to 70# basis weights. The sheet is designed to compare to a smooth offset with high opacity. Available in web rolls, this offset sheet is a 92 brightness.

### reHARVEST

Recent technology developments have enabled the production of high-quality pulp from agricultural fibers. What was previously either burned or tilled in is now collected, pulped, and available for papermaking. The reHARVEST™ family uses a range of percentages of agricultural fiber depending on the end use while maintaining key product specifications and performance.

- **Coated** – Available in 80# and 100# coated grades in gloss and matte and a range of 82 to 86 brightness
- **Uncoated Offset** – 82 to 84 brightness grades are available in 60# and 70# basis weights
- **Envelope** – The reHARVEST envelope is 80 to 82 brightness and available in 24# basis weight
- **Natural Kraft** – We blend agricultural fiber, post-consumer waste, and kraft fiber for use in flexible packaging applications such as paper bags, pouches, and poly-coating basestocks. The products are FDA compliant, available in 30# to 70# basis weights, and contain greater than 40% agricultural fiber.
